ABCo USA
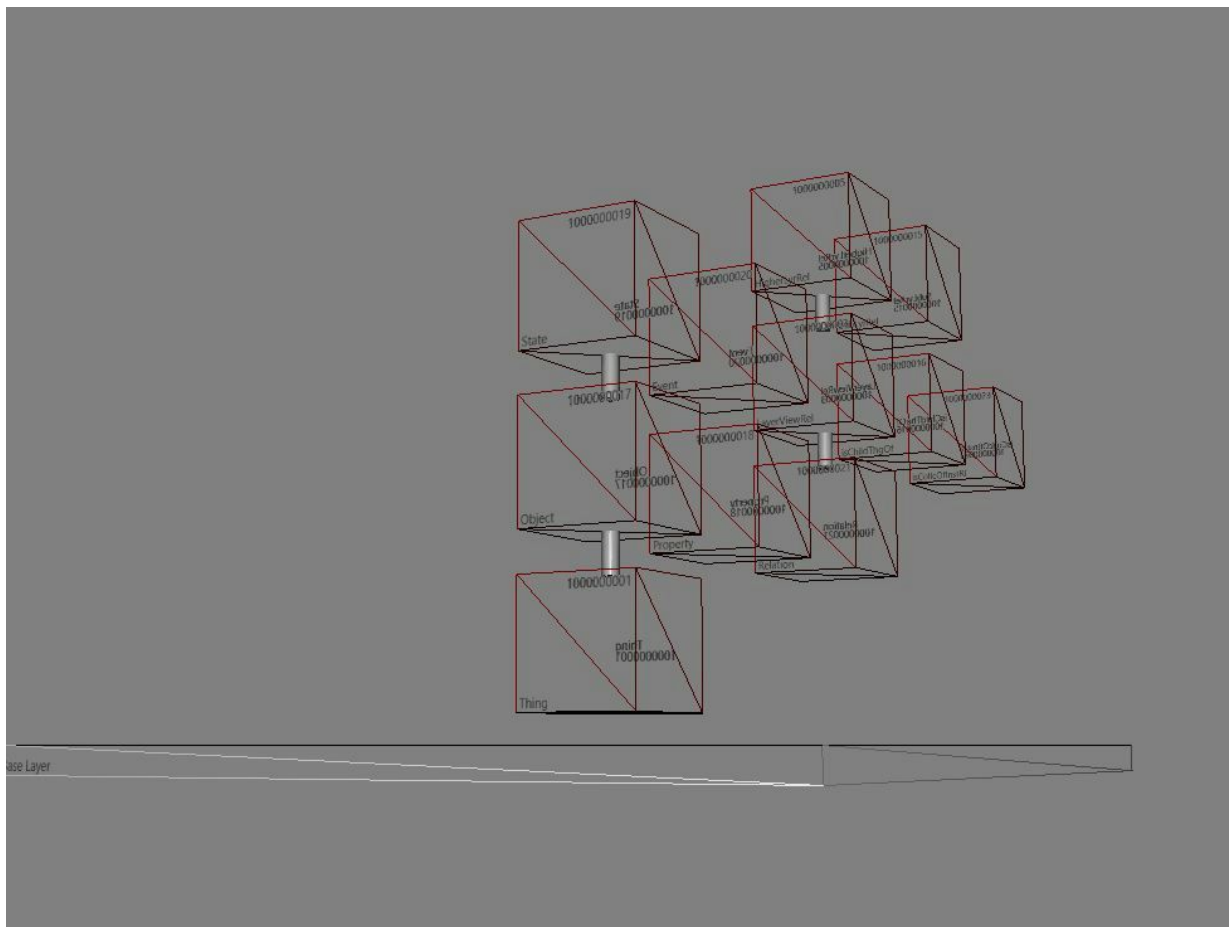

Governance Of Things (GOT Software)

We're committed to quality
software

1. Structured Things within Domain

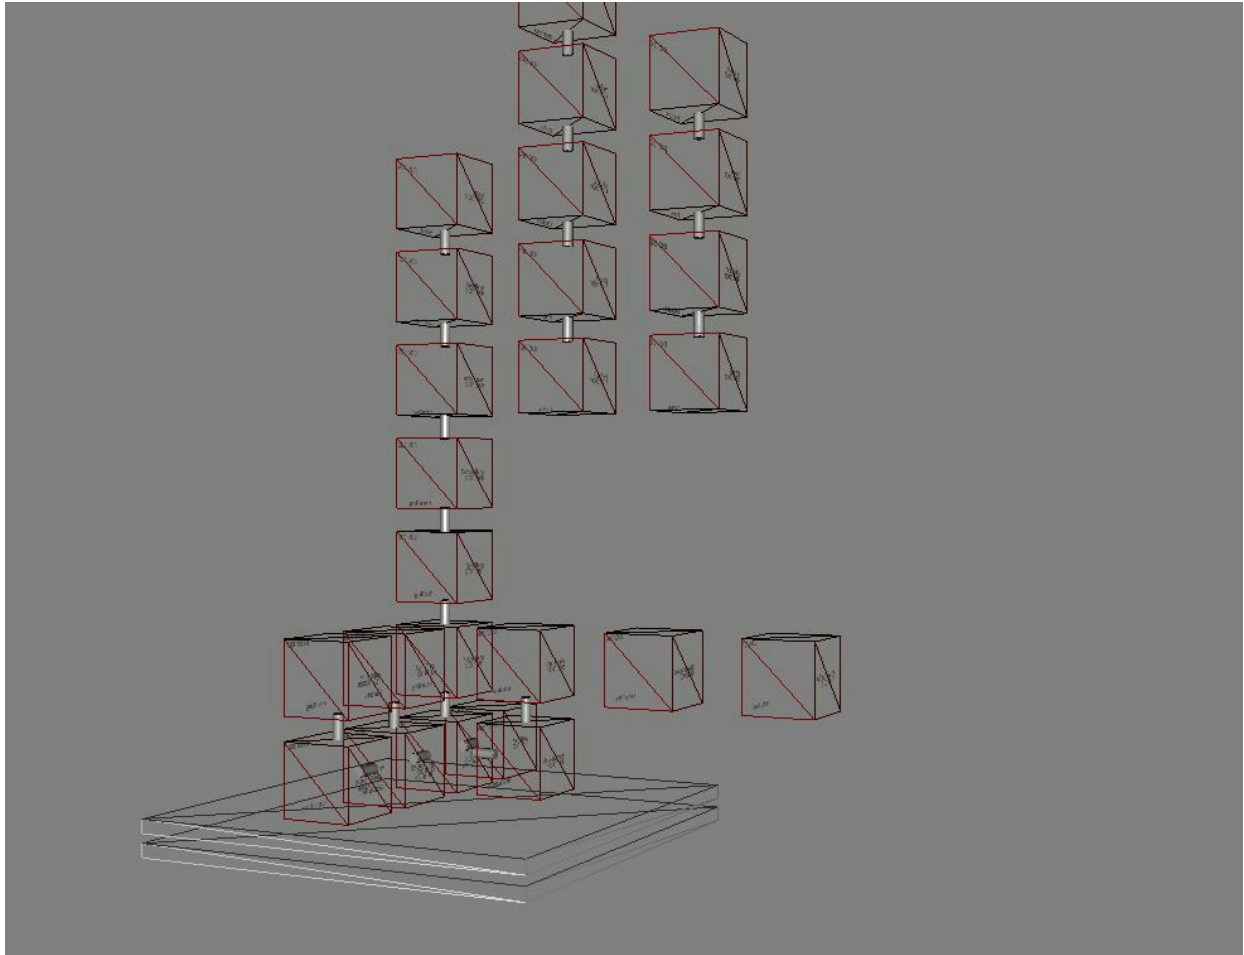

We also offer:

Enterprise Integration

After Cloud, BIGDATA, InfoSecurity and Internet of Things, Companies (small or large) need to put their IT Departments together under a single framework. Enterprise Integration is going on for some time from service integration point of view, it is now time to integrate entire IT operation with Business.

2. Meta Physical Base Diagram of Things

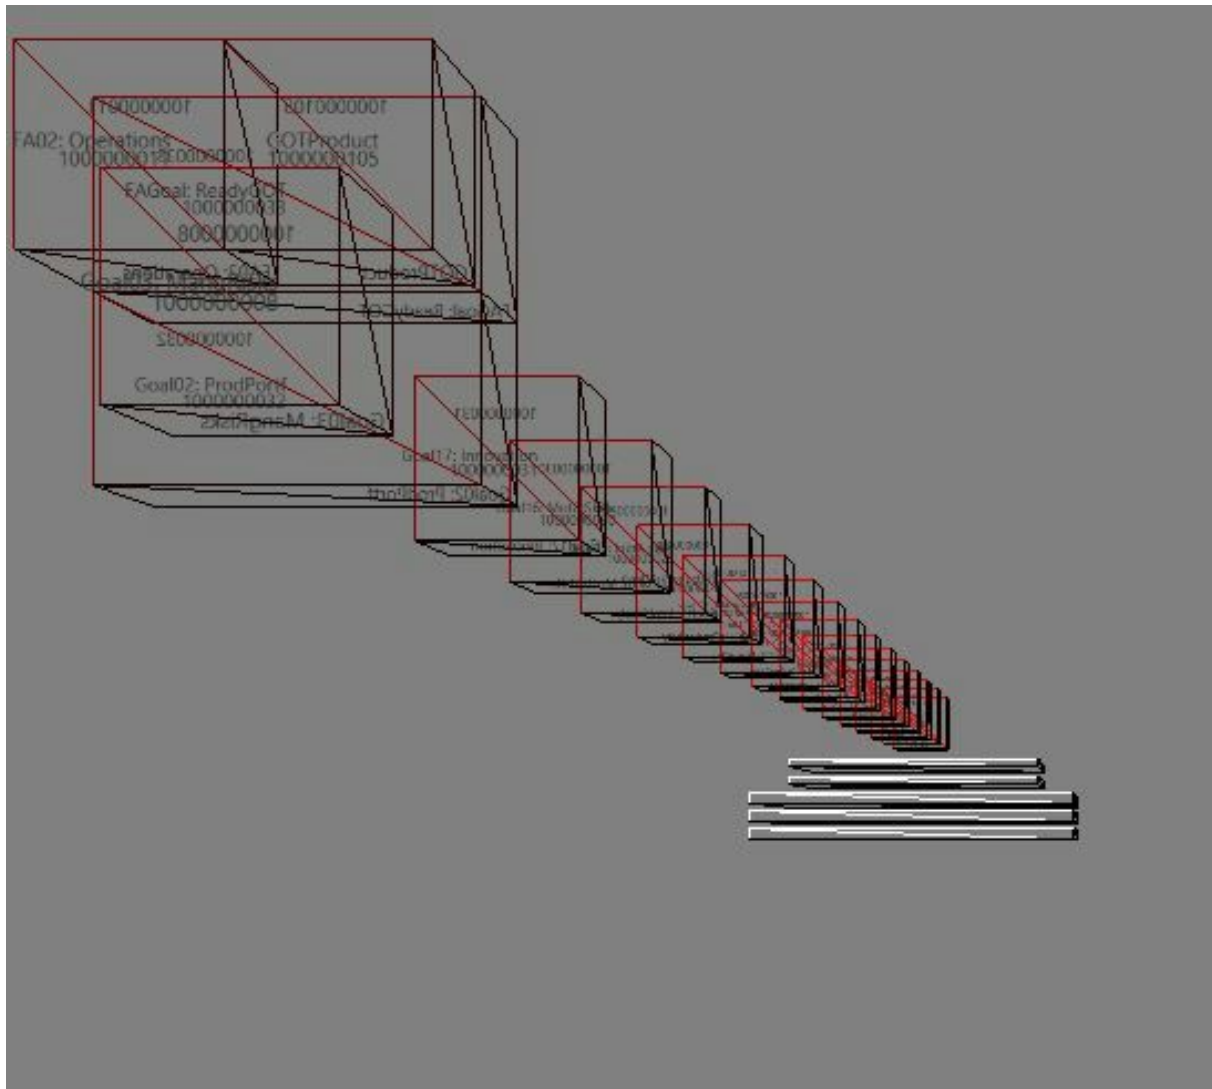

We also offer:

Governance 123

This advice is based on my experience after going through a self learning tour of IT Governance with COBIT 5. I got interested in this framework and spent over a month on self reading. After getting a reasonable confidence, I implemented this framework in a small school environment (both for IT and Non-IT related governance).

3. Objects and their structure

We also offer:

School Mgmt System

A google cloud based solution for Schools Management.
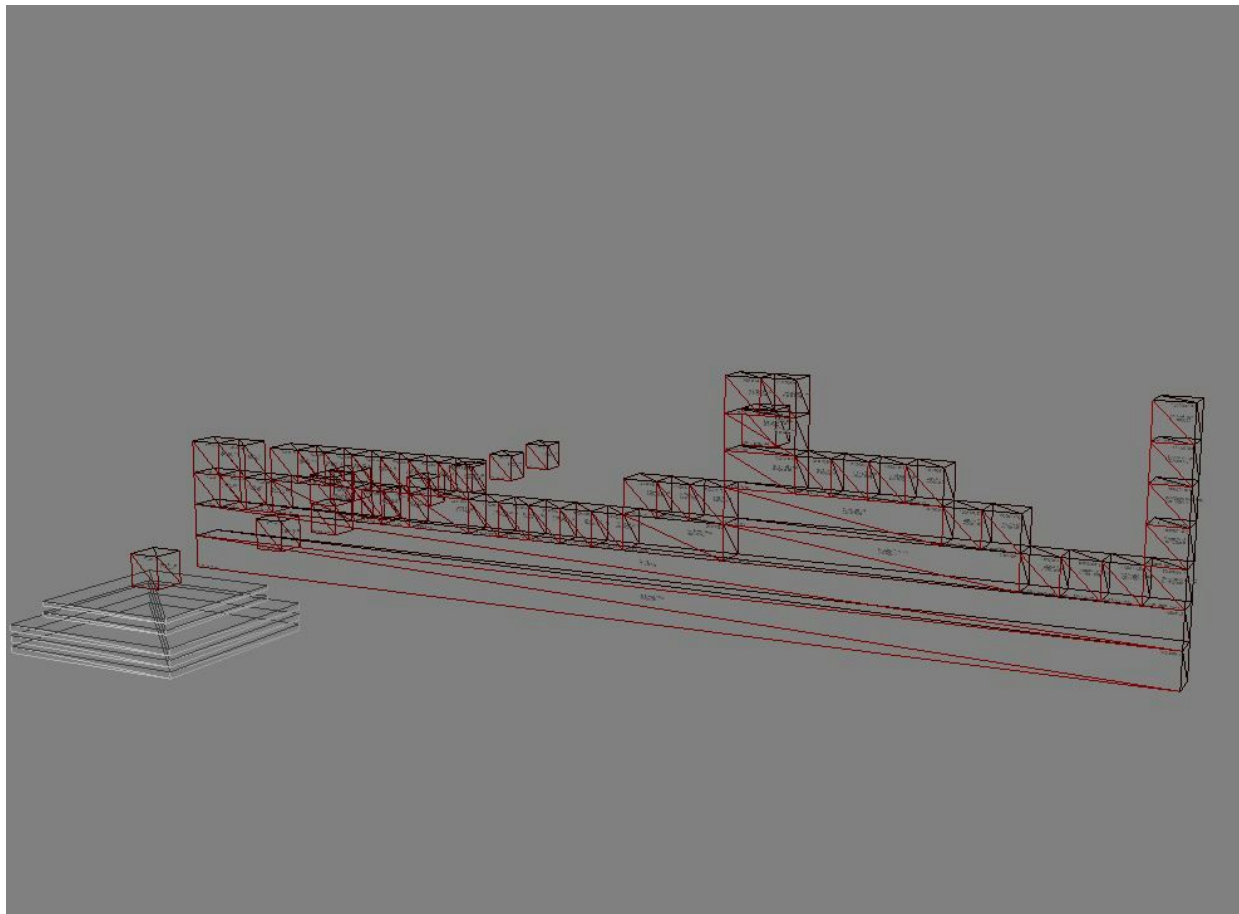

4. Goals Diagram:

We also offer:

Litigation Mgmt System
For Attorneys and Law Firms: Define case strategy, set your milestones and tasks.
Then sit back and monitor in a cloud environment.

5. Strategy, Programs and Projects linked to Capabilities/Information/Services

We also offer:

aSoftwareMethodology
Methodology is less focused on process and more on producing value in terms of software artifacts.
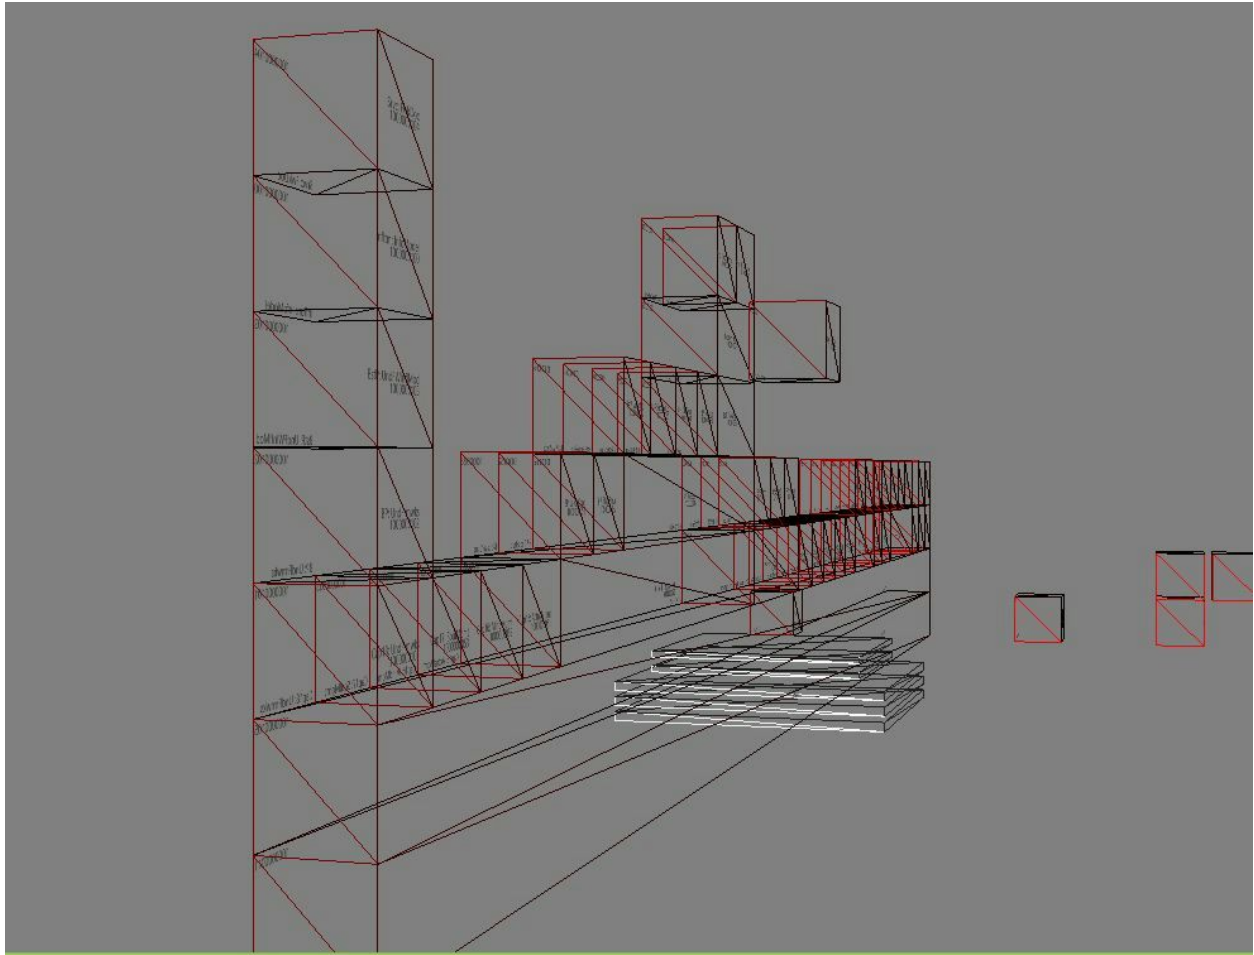

6-1 Capabilities Model, Front View

We also offer:

IT Governance
How we implemented in a small business environment.

6-2 Capabilities Model, side view

At ABCo USA
