# ABCo USA, Governance Of Things (GOT Software)

We download your software object names and db-file names into our GOT System.
We allow you to map your system objects and db-files to run-time environments.
We allow you to develop information items from DB files and services from software objects.
We facilitate to group information items, map them to Business Processes.
We facilitate further to complete Business Process specification, map Capabilities and goals.
We help to develop strategies into programs/projects and map to capabilities/Bus Processes.
GOT Software shows a full 3D view from Goals to capabilities, Strategy to Sprint, Service
Libraries, Technical Architecture, and product capabilities to services and systems.

At ABCo USA

High quality and 100% customer satisfaction are our top priorities.
